As a chef, Hom has always loved experiencing different types of foods from different cultures, but what he hates the most is blindly walking into a restaurant without specifically knowing how long he is going to have to wait to be seated.

Hom's brother, Todd, works as a waiter at a restaurant and invites Hom to try some of the food they serve. Todd understands his brother's pet peeve regarding wait times, and suggests that Hom downloads the Trackr app.

After downloading the app, Hom types the restaurant Todd works at, "Pickle Garden," in the search bar and looks for a table that has the least amount of wait time.

After finally selecting the table he wants, he is told his table number and his wait time.

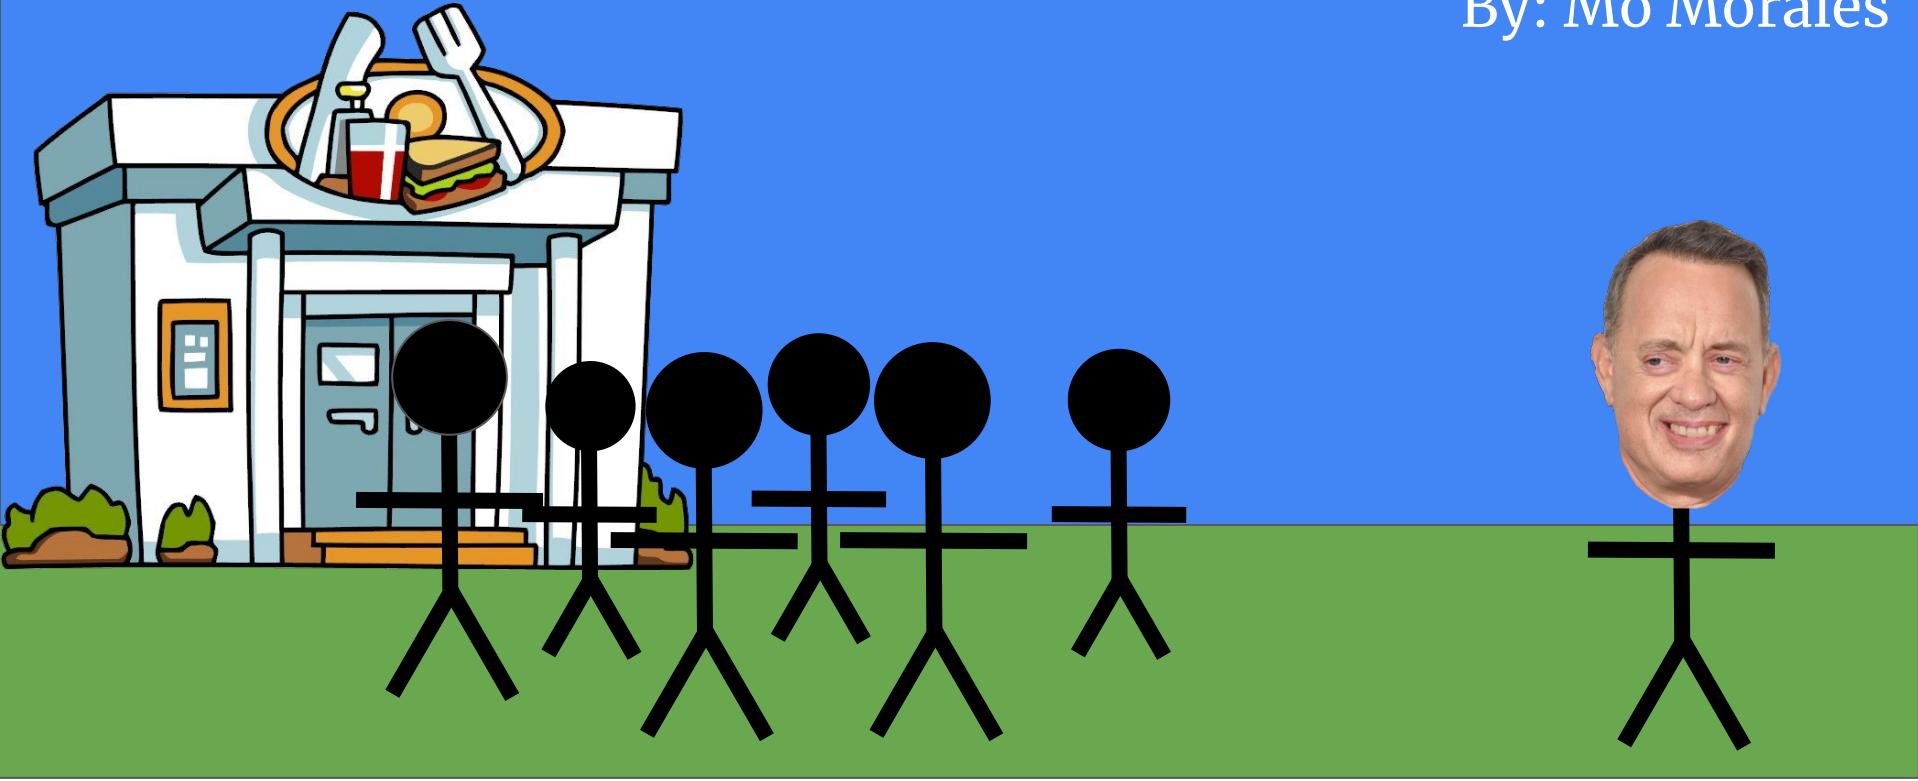

As Hom patiently waited for his table to be ready, he took the time to use the app's digital menu feature to look over the restaurant's meal options.

When it came time for Hom to be seated, he had already come to a decision as to what he wished to eat and did not hesitate to place his order when the waiter arrived. He was quite satisfied with how quickly he received his meal and how delicious it was.

Hubert Roosevelt tries TRAKR

Hubert Roosevelt has recently just retired
and to celebrate wanted to take his wife
out to a fancy dinner

Hubert looked up fine dining on his phone and found a cool new app at the top of google search

A screenshot of a Google search results page. The search query "Fine Dining" is entered in the search bar. Below the search bar, there are several navigation tabs: "All" (which is underlined in blue), "Videos", "Apps", "Books", "Shopping", "More", and "Search tools". A text overlay "About 53,700,000 results (0.39 seconds)" is displayed. The search results include three main items: "TRAKR: Find new restaurants and place a reservation in app!", "Top ten fine dining restaurants", and "DON'T EVER GO TO THESE FINE DINING RESTAURANTS AFTER YOU HEAR WHAT HAPPENED".

Fine Dining

All Videos Apps Books Shopping More Search tools

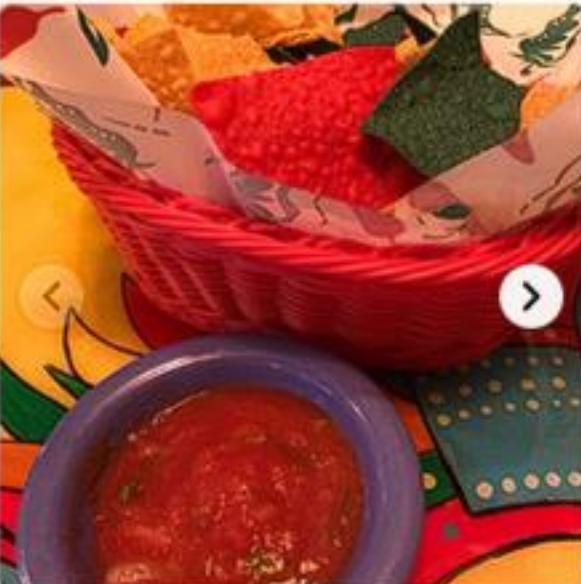

About 53,700,000 results (0.39 seconds)

TRAKR: Find new restaurants and place a reservation in app!

Top ten fine dining restaurants

DON'T EVER GO TO THESE FINE DINING RESTAURANTS
AFTER YOU HEAR WHAT HAPPENED

Hubert downloads the app and finds a Mexican restaurant that is rated 4 stars

Best Mexican Place Ever **TRAKR**

★ ★ ★ ★ 185

Mexican \$

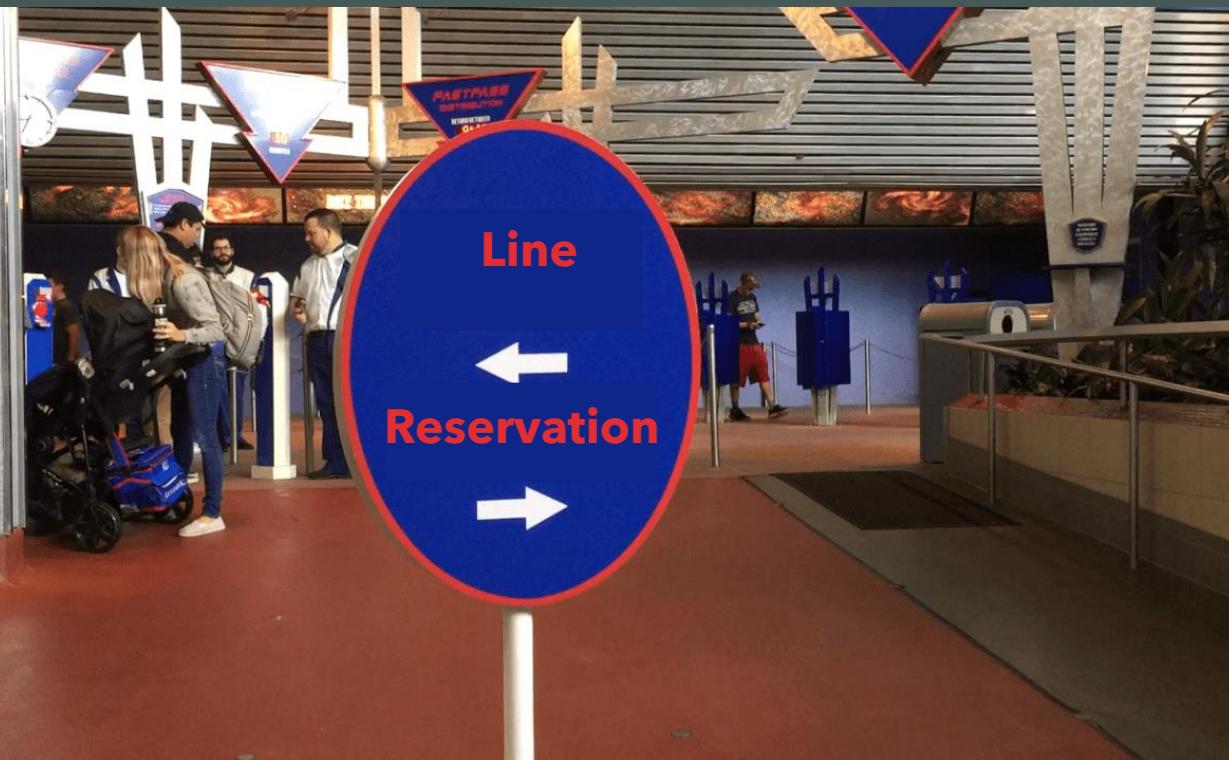

Open until 10:00 PM

▢ "it there is nothing wrong with that. It is always quite flavorful. The margaritas are nice as well. It is a great place to get your **Mexican** food fix." [more](#)

✓ Outdoor seating ✓ Delivery ✓ menu

Reserve Spot

Hubert gets to skip the line due to his reservation and enjoys a nice dinner

Hubert leaves a 5 star rating for the app on the app store and recommends it to all his friends

Hubert buys the premium feature on
the app to skip to the front of the line
when reserving in the app

Dimmy Jonaldson has a new YouTube video idea: take a girl on a date and PRANK HER! But first, he needs to get a girl, and find a good restaurant to go to (which can't be his).

Dimmy decides to go on Tinder and match with someone and ask them on a date, letting them know it's for a video. He then goes on TRACKR to find a restaurant he can reserve now, that seems good enough to record at.

Dimmy has a great time at the dinner date with a woman he met 5 minutes ago. Fortunately, his girlfriend doesn't suspect a thing!

He heads home, and sends the video to his editor to edit.

After seeing the ease of use for finding a restaurant for his date, Dimmy decides to look into implementing his own restaurant into the TRACKR app. After some quick searching, he manages to set up his restaurant in the app, with a small yearly fee to keep the application afloat.

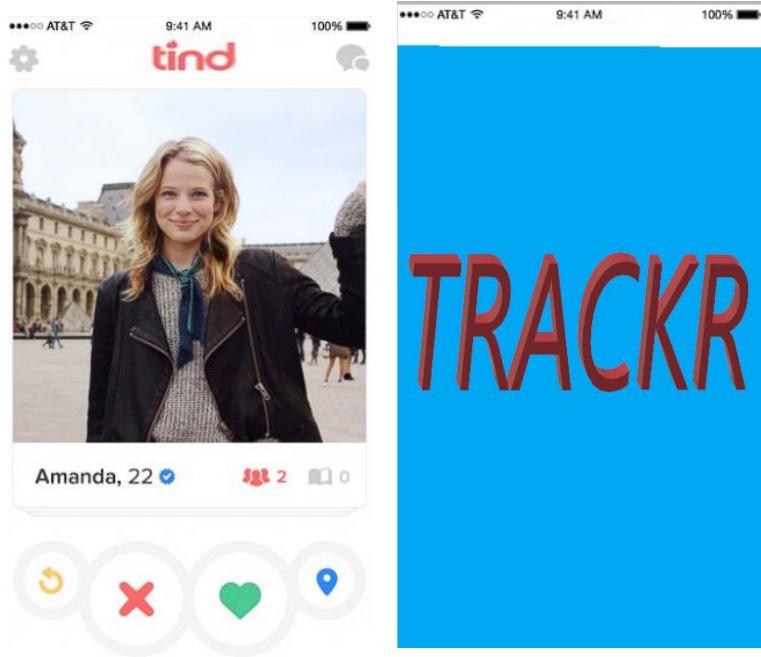

After implementing the app, Dimmy's restaurant is able to get more customers in and out the door faster, and with more efficiency. He's raking in profits from using this simple app. Customers are able to reserve in the app. After a few months of success in his restaurant, some TRACKR workers come and set up some special equipment to help see which seats are reserved, further making efficiency!

Billy Steinberg is a family man who wants to spice up his family dinners. He wants a meal more interesting than his typical sunday famiy dinner while watching football on the couch

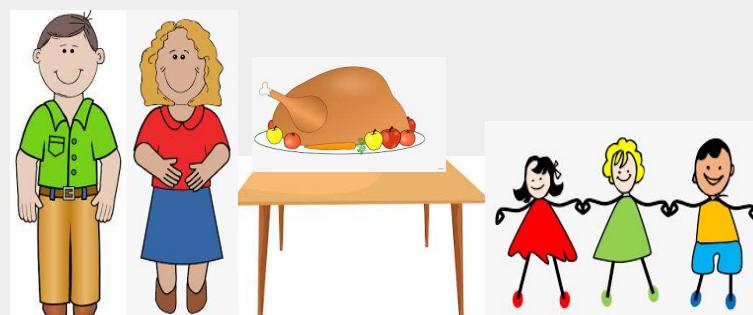

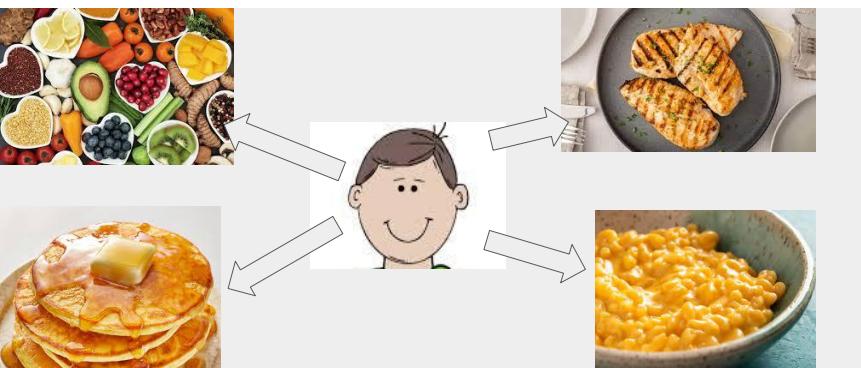

Billy enjoys going out to resturants but he is bored of the typical hometown places he ends up going to with his family every weekend.

However Billy doesn't want the hassle of having to wait on long lines for the best restaurants in the area. He also hates calling in reservations

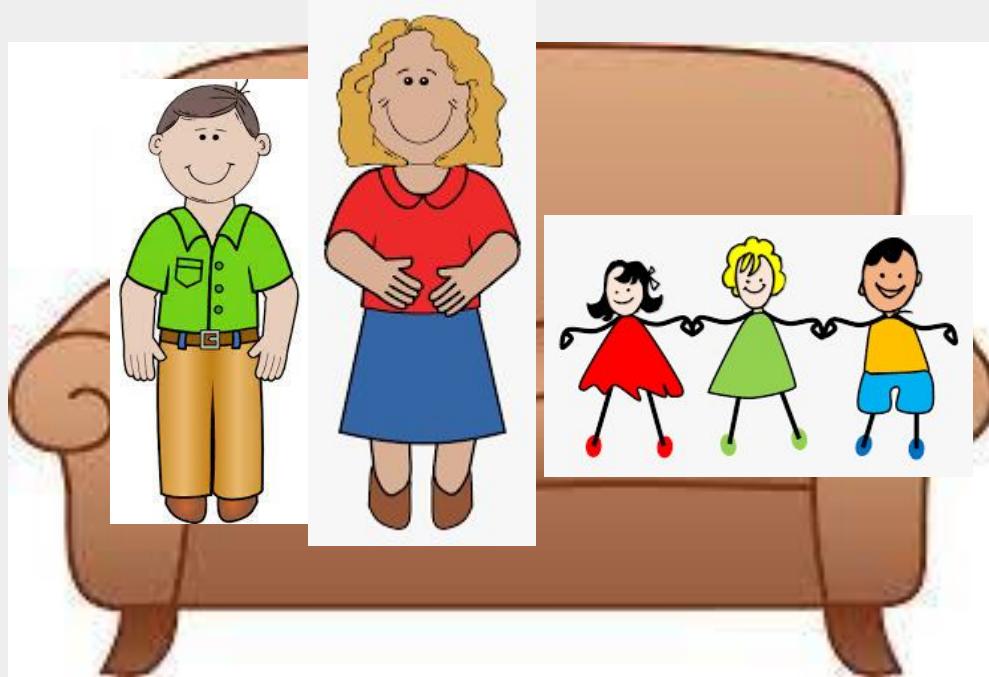

With our app Billy can book reservations in advance on the app as well as pick his seat location.

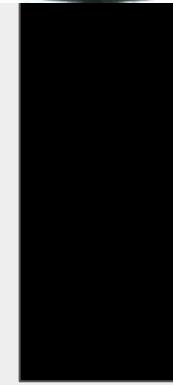

Now Billy can enjoy family dinners at a multitude of resetaurants every weekend and try out different types of food

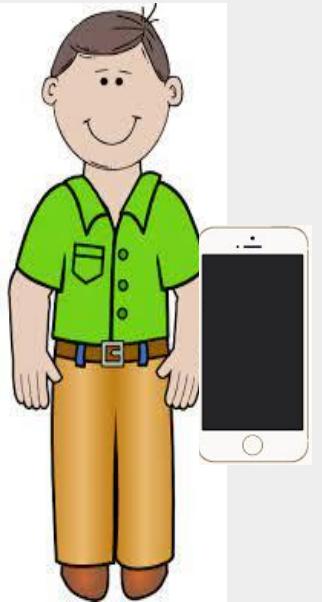

His family will now all be satisfied that he gets to spend quality time with them every single weekend at different places.

Jason wakes up at 6:00 AM as usual. He hurriedly completes his morning routine and checks his phone. He has a meeting soon and he has to get lunch away from home again, since he doesn't have time to come home or prepare his own food.

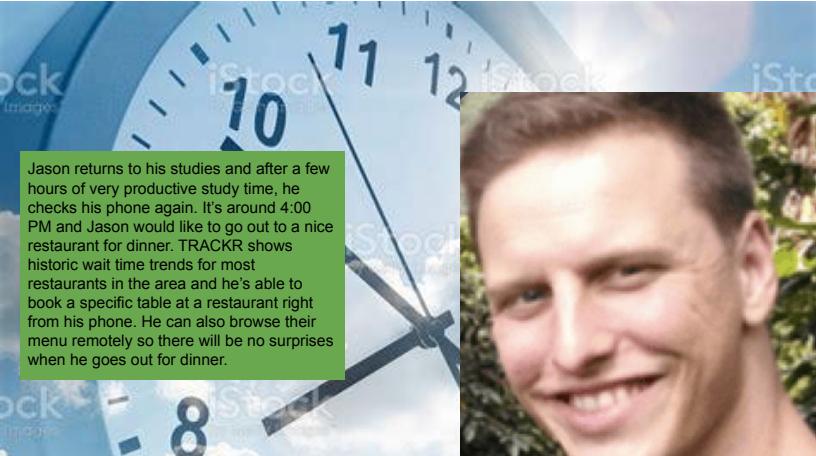

Jason finishes a meeting for a class project and checks his phone around noon. He opens TRACKR to find that it provides a convenient list of low wait time options for take-out food.

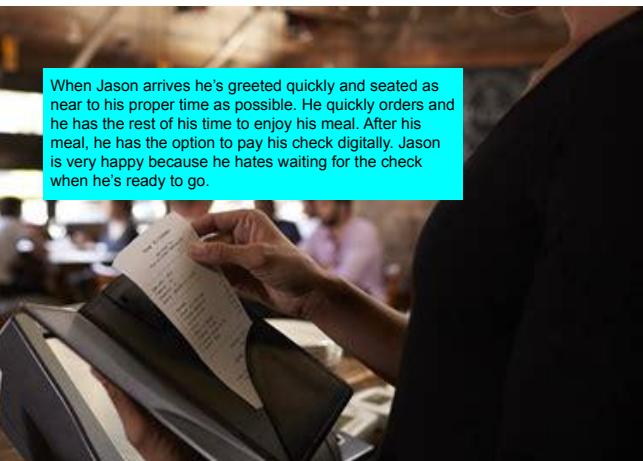

Jason uses his phone to check in to the restaurant of his choice. The staff are able to see how soon he will arrive for pickup and they know to expect him. There's a smooth handoff of Jason's food and he only has to wait about five minutes.

Jason returns to his studies and after a few hours of very productive study time, he checks his phone again. It's around 4:00 PM and Jason would like to go out to a nice restaurant for dinner. TRACKR shows historic wait time trends for most restaurants in the area and he's able to book a specific table at a restaurant right from his phone. He can also browse their menu remotely so there will be no surprises when he goes out for dinner.

When Jason arrives he's greeted quickly and seated as near to his proper time as possible. He quickly orders and he has the rest of his time to enjoy his meal. After his meal, he has the option to pay his check digitally. Jason is very happy because he hates waiting for the check when he's ready to go.

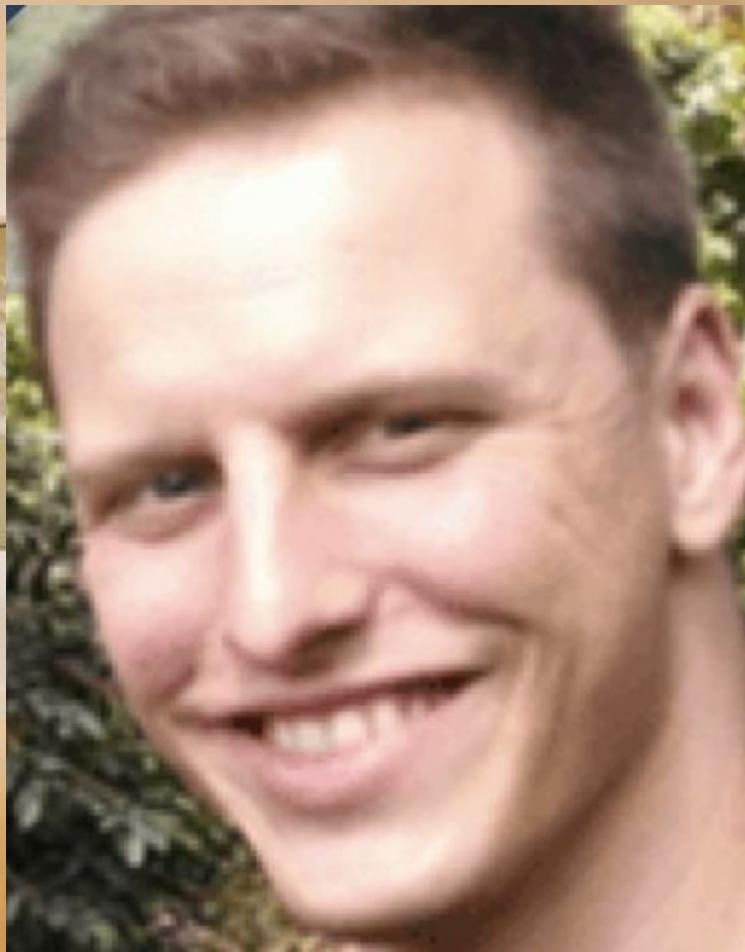

Once Jason is home and he's had time to let the food digest, he decides that the restaurant he visited had such good service and food that they deserve a five star review. He opens TRACKR again, visits the restaurants page, and adds a detailed five star review with a catchy one-line summary. He saves the restaurant to his favorites list so that he's easily able to rebook the restaurant on impulse.
